Scientific Reports

Dear Dr. Yang,

V4 INTERNAL WORKING DRAFT

This is a working cover-letter scaffold for *RankCloak Conceals the Surface Form of Synthetic Cryptographic Artifacts in Language Model Generated Text* (submission 0170c7b2-1065-4344-a5d5-b839b51ac22c).

Stage 1 prepares the V4 documents, audits existing evidence, and analyzes retained entropy traces. The manuscript and response are not ready for submission. Boundary-coherence evaluation, targeted diagnostic decisions, manuscript integration, and archive version coverage remain pending.

Internal pending work. Replace this paragraph with an accurate account of the completed V4 changes after the response matrix is resolved. Address the editor and both current reviewers. State adverse findings and remaining limitations directly. Confirm the final deposited version and DOI coverage before making an availability claim.

RankCloak concerns surface-form concealment and recovery of synthetic cryptographic artifacts under a shared configuration. It does not establish cryptographic secrecy, statistical indistinguishability against the evaluated informed attacker, or reliable transmission under arbitrary text transformations.

Sincerely,

Alexander V. Mantzaris
